SPOKEN LIKE A SOLDIER.
Major General Greenleaf's Frank Advice.
To Points Out the Only Way to Keep Well in the Spring.
The Gallant Vermont Gives His Own Graphic Experience.

The efficiency of the Vermont National Guard appears on the records of the War Department at Washington, where are filed the complimentary reports of the army officers who have inspected it. This efficiency is largely due to the work of Brigadier General W. L. Greenleaf of Burlington, Vt., Commander of the National Guard.

No man is better known by the officers of the National Guard of the different States than the General, and what he says is always considered authoritative.

He has the courage of his convictions, and he is not afraid to say what he thinks should be said. He is a man of few words, but when he speaks, he speaks with authority.

His experience with the Vermont National Guard is a valuable one. He has seen the Guard in action, and he knows what it is capable of. He is a man of great courage and a man of great ability.

His advice is to keep well in the spring. He says that the only way to keep well is to keep the body in good condition. He says that the only way to keep the body in good condition is to keep the mind in good condition.

His advice is to keep well in the spring. He says that the only way to keep well is to keep the body in good condition. He says that the only way to keep the body in good condition is to keep the mind in good condition.

BREWER LOCALS.
Dust is again becoming a feature to be seen, and on the streets.
Mr. S. N. Hodgson has returned to the scene of his lumbering operations up river.
Miss Lillian Danielson, superintendent of L. L. Leland's paint factory, has returned from her trip to Boston.
Capt. Theodore Keel, of South Brewer, who has been ill with the grip, has now entirely recovered from its effects.
Our citizens are now beginning to take off the outside windows that have been on their houses during the winter.
Miss Sue Sargent, of South Brewer, is ill with typhoid fever. Many friends will hope to learn of her speedy recovery.
The city has been filled with the posters announcing the engagement of "Yon Youson" company at the Bangor Opera House next week.

Some small row boats are being made at the boat shop of Mr. H. J. Leach, for various parties. They are well constructed and neatly modelled crafts.

The weather has been receiving lately some to have been satisfactory to everybody, judging from the expressions that have been heard on the streets.

The warm weather and the constant travel over them is improving the condition of our streets and sidewalks, and the walking and riding are growing better.

Yesterday the boiler of the new steamer "Sagittarius" was put in position in her hold, and the work of putting in and fitting together the various portions of the boiler's machinery has commenced.

Mr. Elisha Higgins leaves on next Monday for Augusta, where he will take charge of the preparing of the steamer "Sagittarius" for the summer season.

"Now regulate her up," said a gentleman recently to a jeweler as he left his watch for repairs and after he had gone out it was remarked that most people speak of a watch as being "regulated" down pretty fine. Which expression is right?

The special meeting of the department of more and help of the World's Fair League, connected with the First Methodist church, which was held last evening, was for the purpose of planning for action in regard to a case in the city where it is needed, a worthy object.

At the meeting of Willey Lodge, I. O. O. F., Tuesday evening, W. H. Plummer, Grand Patriarch of the Grand Encampment, and Grand Patriarch of the Grand Encampment, spoke at length upon the matter of forming an encampment here and it is hoped that the effort to organize one may be successful.

The steamer "Columbia" will make her first trip of the season from Bangor to Portland on Saturday of this week. Capt. Shute will command her, as usual, and Mr. George Harrison, of this city, will be the purser. The rest of the officers and crew will be made up about the same as during the last season.

A horse owned and driven by Dea. George Snow, got frightened at an engine in Penobscot square yesterday forenoon, and a runaway was quickly in progress.

It did not last long, however, and the engine of consequence was damaged. The owner of the team was thrown out, but fortunately was not injured.

A number of Brewer ladies were in the audience at the meeting in the Bangor Y. M. C. A. building, yesterday afternoon, which was addressed by Mr. John G. Woolley. All of these services are very interesting and helpful.

Mr. George Harrison, of this city, will be the purser. The rest of the officers and crew will be made up about the same as during the last season.

Amateur photography, as a real decided craze, has not yet invaded Brewer, although some of our people, the young mostly, are somewhat enthusiastic over it and own and find great pleasure in using cameras of various makes and sizes.

It is a means of enjoyment that is very fascinating and will probably grow in popularity here in the future.

There seems to be a desire among the patrons of the electric railroad, to have a half hour service inaugurated for the future day. Instead of the present arrangement, and the matter is under consideration by some of the officials of the company.

It appears as though, during the summer season, especially, such a service would be sufficiently remunerative, and it would be an accommodation to many people.

The ice in the river grows weaker in appearance every day, the warm sun setting powerfully upon it, and if there was any frost the fields would very soon break up, and start on their journey to the sea.

They are in such a condition, that it does not seem as though it would be long before the Penobscot will again be open to navigation. Last year at this time it was open, and the ferry boat was running between the two cities.

"AT THE PULP MILL." The scene about the pulp mill at South Brewer, is much changed from what it was three months ago. The towering piles of wood which then were visible, have in a great measure disappeared, and were it not for the other sources from which the mill draws its supply of material, would be entirely gone before the starting of Ayer's mill, which furnishes the most of the wood for the manufacture of pulp there. Quite a quantity of small spruce logs, cut in four foot lengths, have been hauled to the yard and are now being stripped of their bark and used in the mill. Business is moving along nicely and a goodly amount of pulp is turned out every day.

A Hermit Hunter Found.
Last Saturday two hunters, from Clearfield who were out in the woods of the Alleghenies found a dead man in Andy Reese's camp on Bon's mountain. The dead man's name was John J. Reese, and for several years he had lived alone there in the mountain fastnesses with no companion but his dog, and when a hunting party would locate at the camp for a short season. For months at a time he never saw civilization, living entirely on the game and fish he could shoot and catch.

For a long time he lived in a hut made of bark, fashioned like an Indian's. He wandered over the mountain with his dog and gun, and seemed to enjoy his solitary existence. When found, it was evident that he had been dead several days, perhaps weeks, and the giant and emaciated form of his faithful dog was by his side, almost dead from starvation. And he would not doubt have remained there and died by the side of his dead master and never dreamed of deserting his post.

His body was found in a cave, and it was found that he had been dead several days, perhaps weeks, and the giant and emaciated form of his faithful dog was by his side, almost dead from starvation. And he would not doubt have remained there and died by the side of his dead master and never dreamed of deserting his post.

WORLD'S FAIR.
Some Interesting Notes About the Exposition.
Newfoundland has decided to participate in the Exposition.
The limit of time in which States and territories and foreign countries must accept the sites allotted them at the Exposition grounds has been fixed at June 1, 1892.
Mr. S. J. Hunter, of Nevada, Mo., has a collection of over 10,000 varieties of plants, and has decided to exhibit them at the Exposition.
The Arkansas State Fair Board has selected ten acres near Little Rock, which it will cultivate with the view of exhibiting the products of the soil at the Exposition. The Board has made arrangements to send to Chicago for the Exposition building material of pine, white oak, red oak, sweet gum, cypress and walnut.
The New South Wales World's Fair Commission is contemplating sending for exhibition at the Exposition copies of the "Illustrated" and "The Illustrated" of the State of New South Wales, and also a whole lot of aborigines.
The president of the Tennessee World's Fair Board has called a convention of the representatives of the manufacturing, mining, railroad, marble, timber and other industrial enterprises and interests of East Tennessee to meet at Knoxville, March 28, for the purpose of considering and taking action as to ways and means for providing for a creditable exhibit at the Exposition.
